

## Editorial

These proceedings contain the papers presented at the Association of Public Authority Surveyors Conference (APAS2012), held in Wollongong, NSW, Australia, on 19-21 March 2012. Papers were not peer-reviewed but have been subject to changes made by the Editor. The Editor would like to thank all authors for their contributions covering a wide range of topics relevant to the surveying and spatial information community, thus ensuring an exciting and informative conference.

Authors are welcome to make their paper, as it appears in these conference proceedings, available online on their personal and/or their institution's website, provided it is clearly stated that the paper was originally published in these proceedings. Papers should be referenced according to the following template:

Janssen V. (2012) Likely impact of the approaching solar maximum on GNSS surveys: Be alert but not alarmed, *Proceedings of Association of Public Authority Surveyors Conference (APAS2012)*, Wollongong, Australia, 19-21 March, 66-82.

APAS is not responsible for any statements made or opinions expressed in the papers included in these conference proceedings.

NSW Land and Property Information (LPI) is gratefully acknowledged for providing the front cover artwork and producing these proceedings, and for sponsoring the conference in general. The APAS committee is thanked for their hard work in organising this conference.
