

Editorial

These proceedings contain the papers presented at the APAS Webinar Series 2021 (AWS2021), held 24 March – 30 June 2021. Unfortunately, like in the previous year, the Association of Public Authority Surveyors Conference (APAS2021) had to be cancelled due to the ongoing coronavirus/COVID-19 pandemic. In order to allow APAS to continue providing a professional development event and following the success of last year's webinar series, it was decided to organise the APAS Webinar Series 2021.

Papers were not peer-reviewed but have been subject to changes made by the Editor. The Editor would like to thank all authors for their contributions covering a wide range of topics relevant to the surveying and spatial information community, thus ensuring an exciting and informative online event. The University of Southern Queensland (USQ) is thanked for hosting the APAS Webinar Series 2021, with special thanks to Jessica Smith, Lecturer in the School of Civil Engineering and Surveying.

Authors are welcome to make their paper, as it appears in these proceedings, available online on their personal and/or their institution's website, provided it is clearly stated that the paper was originally published in these proceedings. Papers should be referenced according to the following template:

Janssen V. and McElroy S. (2021) The Australian Height Datum turns 50: Past, present & future, *Proceedings of APAS Webinar Series 2021 (AWS2021)*, 24 March – 30 June, 3-27.

APAS is not responsible for any statements made or opinions expressed in the papers included in these proceedings.

DCS Spatial Services, a unit of the NSW Department of Customer Service (DCS) is gratefully acknowledged for providing the front cover artwork and producing these proceedings. The APAS committee is thanked for their hard work in organising this event.
